DETAILED ACTION

Page 2

1. Claims 9-38 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 1773

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Maro et al (U.S. Patent 5,804,300).

Maro et al disclose a laminate comprising substrate (1) (C0I. 4, lines 4-9) coated with a silicon oxide layer (2) (CoI. 4, lines 18-26), the thermoplastic layer (6), outer substrate layer (7) and sealing medium layer (4b). The polymer forming thermoplastic layer (6), outer substrate layer (7) and sealing medium layer (4b) are polyolefin such as polyethylene, polypropylene etc. (CoI. 5, lines 16-19 and 39-44, coI. 6, lines 4-16 and Figure 2). The limitation (for a solar battery module" is considered intentional use.

6. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamada et al (U.S. Patent 6,335,479 B1).

Yamada et al disclose front and back side protective sheets for solar battery module comprising substrate sheet (1) coated with inorganic oxide thin film. Yamada et al suggest addition of pigment to back and front side protective sheets. Yamada et al also disclose clamed stacking of front and back side protective sheets (Figs. 23, 29). The filler layers 12 and 14 are made of polyolefin. The layer 303 and 304 can be on both sides of inorganic oxide coated substrate (1) (Col. 99, line 1 to col. 101, line 68). The polymer for layer 303 includes polyolefin (Col. 100, lines 55-67).

Art Unit: 1773

Therefore given the teaching of Yamada et al, it would have been obvious to a person of ordinary skill in the art at the time of this invention made to optimize design of back side protective sheet depending on application.

No claims are allowed.

7. Receipt of Information Disclosure Statement filed March 04, 2005 is acknowledged and all recited Japanese documents have been considered to the extent of provided their English abstract and made of record.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. S. Nakarani whose telephone number is (571) 272-1512. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carol Chaney can be reached on (571) 272-1284. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a
